Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. As of entry of the Applicant's arguments filed on dated 12/05/2005, claims 1-10 are pending in this application. Upon reconsideration, the rejection of claims 1-2 by Wong et al. mailed 09/07/2005 is hereby withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Du et al.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 are rejected under 35 U. S. C. § 102(b) as being anticipated by Du et al., U.S. Patent. No. 6,809,686.

With respect claim 1, Du et al. discloses a multiple antenna comprising a ground electrode (120)(See column 3, line 7-16); a dielectric substrate (40,80) disposed on a top surface of the ground electrode (120); a planar antenna electrode (60) disposed on a top surface of the dielectric substrate (40,80); feeding terminal electrically coupled to the planar an antenna (see fig. 1A), an upper antenna electrode (20) disposed above the planar antenna electrode (40) with a given space in-between such that the upper antenna electrode faces the planar antenna electrode (see fig. 1A); and a feeding section electrically coupled to the upper antenna electrode (see fig. 1A), wherein the upper antenna electrode (20) has an opening facing the planar antenna electrode (60) (see fig. 1A).

With respect to claim 2, Wong et al. discloses the upper antenna (20) is shaped like a ring (see fig. 1 A).

Allowable Subject Matter

4. Claims 3-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims, since the prior art of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed a multiple antenna further comprising plurality of ring-shaped upper antenna electrodes disposed above the planar antenna electrode with a given space and inside the opening of the upper antenna electrode, which is then an outer upper antenna and a plurality of feeding electrically coupled to the plurality of upper antenna.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung T. Vy whose telephone number is 571-2721954. The examiner can normally be reached on 8.30am - 5.30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong can be reached on 571 272 1834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
